Subject Index

A

Abciximab

Economic analysis of the Assessment of the Safety and Efficacy of a New Thrombolytic Regimen (ASSENT-3) study: Costs of reperfusion strategies in acute myocardial infarction (Kaul et al). 2005;149:637-44

Effects of abciximab and preprocedural glycemic control in diabetic patients undergoing elective coronary stenting (De Luca et al). 2005;149:1135.e11-1135.e18

The relation of renal function to ischemic and bleeding outcomes with 2 different glycoprotein IIb/IIIa inhibitors: The Do Tirofiban and ReoPro Give Similar Efficacy Outcome (TARGET) trial (Berger et al). 2005;149:869-75

ACE inhibitors; see Angiotensin-converting enzyme inhibitors

Activities of daily living

Impact of cardioversion strategy on functional capacity in patients with atrial fibrillation: The Assessment of Cardioversion Using Transesophageal Echocardiography (ACUTE) Study (Jasper et al). 2005;149:309-15

Acute coronary syndromes; see Angina, unstable; Myocardial infarction; Myocardial ischemia

Adolescence

Relationship between adolescent fitness and fatness and cardiovascular disease risk factors in adulthood: The Aerobics Center Longitudinal Study (ACLS) (Eisenmann et al). 2005;149:46-53

Adrenergic beta-antagonists

Effects of metoprolol and carvedilol on cause-specific mortality and morbidity in patients with chronic heart failure-COMET (Torp-Pedersen et al). 2005;149:370-6

Efficacy, safety and tolerability of metoprolol CR/XL in patients with diabetes and chronic heart failure: Experiences from MERIT-HF (Deedwania et al). 2005;149:159-67

Practical considerations of β -blockade in the management of the post-myocardial infarction patient (Fonarow). 2005;149:984-93 (Curriculum cardiol.)

Why do patients fail to receive β -blockers for chronic heart failure over time? A "real-world" single-center, 2-year follow-up experience of β -blocker therapy in patients with chronic heart failure (Parameswaran et al). 2005;149:921-6

Adulthood

Relationship between adolescent fitness and fatness and cardiovascular disease risk factors in adulthood: The Aerobics Center Longitudinal Study (ACLS) (Eisenmann et al). 2005;149:46-53

Age factors

Factors associated with an increased chance of survival among patients suffering from an out-of-hospital cardiac arrest in a national perspective in Sweden (Herlitz et al). 2005;149:61-6

Impact of age on management and outcome of acute coronary syndrome: Observations from the Global Registry of Acute Coronary Events (GRACE) (Avezum et al). 2005;149:67-73

Should we aggressively treat elderly patients with cardiogenic shock? (Hasdai). 2005;149:962-3 (Editorial)

Thrombolytic therapy for eligible elderly patients with acute myocardial infarction (Yusuf et al) (Letter); (Avezum and Makdisse) (Reply). 2005;149:e25-e26, e27

Aged

A Doppler-derived index of combined left ventricular systolic and diastolic function is an independent predictor of cardiovascular mortality in elderly men (Ärnlöv et al). 2005;149:902-7

Impact of age on management and outcome of acute coronary syndrome: Observations from the Global Registry of Acute Coronary Events (GRACE) (Avezum et al). 2005;149:67-73

Outcome of patients aged ≥ 75 years in the SHould we emergently revascularize Occluded Coronaries in cardiogenic shock (SHOCK) trial: Do elderly patients with acute myocardial infarction complicated by cardiogenic shock respond differently to emergent revascularization? (Dzavik et al). 2005;149:1128-34

A propensity score analysis of the impact of angiotensin-converting enzyme inhibitors on long-term survival of older adults with heart failure and perceived contraindications (Ahmed et al). 2005;149:737-43

Sex, quality of care, and outcomes of elderly patients hospitalized with heart failure: Findings from the National Heart Failure Project (Rathore et al). 2005;149:121-8

Should we aggressively treat elderly patients with cardiogenic shock? (Hasdai). 2005;149:962-3 (Editorial)

Thrombolytic therapy for eligible elderly patients with acute myocardial infarction (Yusuf et al) (Letter); (Avezum and Makdisse) (Reply). 2005;149:e25-e26, e27

Albuminuria

Microalbuminuria: A strong predictor of 3-year adverse prognosis in nondiabetic patients with acute myocardial infarction (Koulouris et al). 2005;149:840-5

Alcohol drinking

Diet and blood pressure: Applying the evidence to clinical practice (Ard and Svetkey). 2005;149:804-12 (Meetings)

Algorithms

Prediction of missed myocardial infarction among symptomatic outpatients without coronary heart disease (Sequist et al). 2005;149:74-81

Alteplase

ST resolution in a single electrocardiographic lead: A simple and accurate predictor of cardiac mortality in patients with fibrinolytic therapy for acute ST-elevation myocardial infarction (Zeymer et al). 2005;149:91-7

Ambulatory care

Intensity and focus of heart failure disease management after hospital discharge (Shah et al). 2005;149:715-21

Prediction of missed myocardial infarction among symptomatic outpatients without coronary heart disease (Sequist et al). 2005;149:74-81

American College of Cardiology

Highlights from the American College of Cardiology Annual Scientific Session 2005: March 6 to 9, 2005, Orlando, Florida (Patel et al). 2005;149:1009-19 (Meetings)

American Heart Association

Highlights from the American Heart Association Annual Scientific Sessions 2004: November 7-10, 2004 (Shah et al). 2005;149:240-53 (Meetings)

Anaerobic threshold

Oxygen uptake efficiency slope, a new submaximal parameter in evaluating exercise capacity in chronic heart failure patients (Van Laethem et al). 2005;149:175-80

Anemia

Prevalence of anemia and effects on mortality in patients with heart failure (Lindenfeld). 2005;149:391-401 (Curriculum cardi.)

Rationale — Trial to Reduce Cardiovascular Events with Aranesp Therapy (TREAT): Evolving the management of cardiovascular risk in patients with chronic kidney disease (Mix et al). 2005;149:408-13 (Trial design)

Aneurysm, dissecting

Investigation of STent grafts in patients with type B Aortic Dissection: Design of the INSTEAD trial — a prospective, multicenter, European randomized trial (Nienaber et al). 2005;149:592-9 (Trial design)

Aneurysmectomy

Effect of coronary artery bypass grafting and aneurysmectomy on QT dispersion in moderate or severe left ventricular dysfunction (Gulcan et al). 2005;149:917-20

Angina, unstable; see also Myocardial ischemia

Acute coronary syndrome national statistics: Challenges in definitions (Bertoni et al). 2005;149:1055-61

Acute coronary syndrome statistics: What you don't see can hurt you (Rajagopal and Bhatt). 2005;149:955-6 (Editorial)

Are we appropriately triaging patients with unstable angina? (Gombert-Maitland et al). 2005;149:613-18

Association of intravenous morphine use and outcomes in acute coronary syndromes: Results from the CRUSADE Quality Improvement Initiative (Meine et al). 2005;149:1043-9

Atorvastatin has an important acute anti-inflammatory effect in patients with acute coronary syndrome: Results of a randomized, double-blind, placebo-controlled study (Macin et al). 2005;149:451-7

Correlation between the TIMI risk score and high-risk angiographic findings in non-ST-elevation acute coronary syndromes: Observations from the Platelet Receptor Inhibition in Ischemic Syndrome Management in Patients Limited by Unstable Signs and Symptoms (PRISM-PLUS) trial (Mega et al). 2005;149:846-50

Does current treatment of cardiogenic shock complicating the acute coronary syndromes comply with guidelines? (Jakobishvili et al). 2005;149:98-103

Early cardiac catheterization is associated with lower mortality only among high-risk patients with ST- and non-ST-elevation acute coronary syndromes: Observations from the OPUS-TIMI 16 trial (Cantor et al). 2005;149:275-83

The Early Glycoprotein IIb/IIIa Inhibition in Non-ST-Segment Elevation Acute Coronary Syndrome (EARLY ACS) trial: A randomized placebo-controlled trial evaluating the clinical benefits of early front-loaded eptifibatide in the treatment of patients with non-ST-segment elevation acute coronary syndrome-Study design and rationale (Giugliano et al). 2005;149:994-1002 (Trial design)

Early initiation of lipid-lowering therapy for acute coronary syndromes improves compliance with guideline recommendations: Observations from the Orbofiban in Patients with Unstable Coronary Syndromes (OPUS-TIMI 16) trial (Smith et al). 2005;149:444-50

Impact of age on management and outcome of acute coronary syndrome: Observations from the Global Registry of Acute Coronary Events (GRACE) (Avezum et al). 2005;149:67-73

Influence of clinical trial enrollment on the quality of care and outcomes for patients with non-ST-segment elevation acute coronary syndromes (Kandzari et al). 2005;149:474-81

Long-term benefits of an early invasive management in acute coronary syndromes depend on intracoronary stenting and aggressive antiplatelet treatment: A metaregression (Biondi-Zoccai et al). 2005;149:504-11

Statins in acute coronary syndromes: The sooner, the better? (Schwartz). 2005;149:377-80 (Editorial)

Urinary tract infection in patients with acute coronary syndrome: A potential systemic inflammatory connection (Sims et al). 2005;149:1063-6

Angina pectoris

Efficacy and safety of a once-daily graded-release diltiazem formulation dosed at bedtime compared to placebo and to morning dosing in chronic stable angina pectoris (Glasser et al). 2005;149:290.e1-290.e9

Stent implantation, but not pathogen burden, is associated with plasma C-reactive protein and interleukin-6 levels after percutaneous coronary intervention in patients with stable angina pectoris (Saleh et al). 2005;149:876-82

Angiography

Correlation between the TIMI risk score and high-risk angiographic findings in non-ST-elevation acute coronary syndromes: Observations from the Platelet Receptor Inhibition in Ischemic Syndrome Management in Patients Limited by Unstable Signs and Symptoms (PRISM-PLUS) trial (Mega et al). 2005;149:846-50

Does current treatment of cardiogenic shock complicating the acute coronary syndromes comply with guidelines? (Jakobishvili et al). 2005;149:98-103

Indications for angiography subsequent to coronary artery bypass grafting (Alter et al). 2005;149:1082-90

Magnetic resonance imaging of coronary arteries, the ischemic cascade, and myocardial infarction (Kaandorp et al). 2005;149:200-8 (Curriculum cardi.)

Multislice spiral computed tomographic angiography of coronary arteries in patients with suspected coronary artery disease: An effective filter before catheter angiography? (Haberl et al). 2005;149:1112-19

Repeat stenting for the prevention of the early lumen loss phenomenon in patients with in-stent restenosis: Angiographic and intravascular ultrasound findings of a randomized study (Alfonso et al). 2005;149:335.e1-335.e8

Which role for multislice computed tomography in clinical cardiology? (Bax and Schuijf). 2005;149:960-1 (Editorial)

Angioplasty

Assessment of Pexelizumab in Acute Myocardial Infarction (APEX AMI): A multicenter, randomized, double-blind, parallel-group, placebo-controlled study of pexelizumab in patients with acute myocardial infarction undergoing primary percutaneous coronary intervention (Armstrong et al). 2005;149:402-7 (Trial design)

A critical appraisal of current models of risk stratification for percutaneous coronary interventions (Singh et al). 2005;149:753-60 (Curriculum cardi.)

Fluvastatin reduces the impact of diabetes on long-term outcome after coronary intervention-A Lescol Intervention Prevention Study (LIPS) substudy (Arampatzis et al). 2005;149:329-35

Repeat stenting for the prevention of the early lumen loss phenomenon in patients with in-stent restenosis: Angio-

- graphic and intravascular ultrasound findings of a randomized study (Alfonso et al). 2005;149:335.e1-335.e8
- ST-segment elevation resolution and outcome in patients treated with primary angioplasty and glucose-insulin-potassium infusion (van der Horst et al). 2005;149:1135.e1-1135.e9
- Stent implantation, but not pathogen burden, is associated with plasma C-reactive protein and interleukin-6 levels after percutaneous coronary intervention in patients with stable angina pectoris (Saleh et al). 2005;149:876-82
- Angioplasty, balloon**
- Elective percutaneous coronary intervention using broad-spectrum antiplatelet therapy (eptifibatide, clopidogrel, and aspirin) alone, without scheduled unfractionated heparin or other antithrombin therapy (Denardo et al). 2005;149:138-44
- Angiotensin-converting enzyme inhibitors**
- Aortic stenosis and angiotensin-converting enzyme inhibitors-Rupture of an ancient paradigm? (Barrera-Ramírez et al) (Letter); (Chockalingam) (Reply). 2005;149:e5, e7
- Effects of angiotensin-converting enzyme inhibitor plus irbesartan on maximal and submaximal exercise capacity and neurohumoral activation in patients with congestive heart failure (Blanchet et al). 2005;149:938.e1-938.e7
- A propensity score analysis of the impact of angiotensin-converting enzyme inhibitors on long-term survival of older adults with heart failure and perceived contraindications (Ahmed et al). 2005;149:737-43
- Angiotensin II**
- Carvedilol therapy is associated with a sustained decline in brain natriuretic peptide levels in patients with congestive heart failure (Frantz et al). 2005;149:541-7
- Angiotensin II type 1 receptor blockers**
- The angiotensin II receptor blocker candesartan cilexetil reduces neointima proliferation after coronary stent implantation: A prospective randomized study under intravascular ultrasound guidance (Yoshida et al). 2005;149:144.e1-144.e6

- beta-Blockers; see Adrenergic beta-antagonists**

Beta rays

Two-year clinical follow up of $^{90}\text{Sr}/^{90}\text{Y}$ β -radiation versus placebo control for the treatment of in-stent restenosis (Silber et al). 2005;149:689-94

Big endothelin (big-ET); see Endothelins**Biofeedback**

Heart rate variability biofeedback as a behavioral neurocardiac intervention to enhance vagal heart rate control (Nolan et al). 2005;149:1137.e1-1137.e7

Biological markers

B-type natriuretic peptide levels are not a surrogate marker for invasive hemodynamics during management of patients with severe heart failure (O'Neill et al). 2005;149:363-9

Cigarette smoking is associated with increased circulating proinflammatory and procoagulant markers in patients with chronic coronary artery disease: Effects of aspirin treatment (Ikonomidis et al). 2005;149:832-9

Erythrocyte adhesiveness/aggregation: A novel biomarker for the detection of low-grade internal inflammation in individuals with atherothrombotic risk factors and proven vascular disease (Berliner et al). 2005;149:260-7

Multimarker risk strategy for predicting 1-month and 1-year major events in non-ST elevation acute coronary syndromes (Bodi et al). 2005;149:268-74

Risk factors for cardiovascular event recurrence in the Atherosclerosis Risk in Communities (ARIC) study (Wattanakit et al). 2005;149:606-12

Biopsy

Diagnostic approach to the patient with cardiomyopathy: Whom to biopsy (Ardehali et al). 2005;149:7-12 (Curriculum cardiol.)

Bleeding; see Hemorrhage**Blood flow velocity**

Behavior of both epicardial and intramural coronary artery flow velocities in various models of myocardial hypertrophy: Role for left ventricular outflow tract obstruction (De Gregorio et al). 2005;149:1091-8

Blood platelets

Cigarette smoking is associated with increased circulating proinflammatory and procoagulant markers in patients with chronic coronary artery disease: Effects of aspirin treatment (Ikonomidis et al). 2005;149:832-9

Blood pressure

Barriers to hypertension control (Borzecki et al). 2005;149:785-94 (Meetings)

Blood pressure variability and prognosis in uncomplicated mild hypertension (Pierdomenico et al). 2005;149:934-8

Diet and blood pressure: Applying the evidence to clinical practice (Ard and Svetkey). 2005;149:804-12 (Meetings)

Improving blood pressure control by tailored feedback to patients and clinicians (Bosworth et al). 2005;149:795-803 (Meetings)

Relationship between adolescent fitness and fatness and cardiovascular disease risk factors in adulthood: The Aerobics Center Longitudinal Study (ACLS) (Eisenmann et al). 2005;149:46-53

Blood vessel prosthesis implantation

Investigation of STent grafts in patients with type B Aortic Dissection: Design of the INSTEAD trial—a prospective, multicenter, European randomized trial (Nienaber et al). 2005;149:592-9 (Trial design)

Body mass index

Effect of body mass index on natriuretic peptide levels in patients with acute congestive heart failure: A ProBNP

Investigation of Dyspnea in the Emergency Department (PRIDE) substudy (Krauser et al). 2005;149:744-50

Prognostic impact of body weight and abdominal obesity in women and men with cardiovascular disease (Dagenais et al). 2005;149:54-60

Relationship between adolescent fitness and fatness and cardiovascular disease risk factors in adulthood: The Aerobics Center Longitudinal Study (ACLS) (Eisenmann et al). 2005;149:46-53

Body weight

Prognostic impact of body weight and abdominal obesity in women and men with cardiovascular disease (Dagenais et al). 2005;149:54-60

Relationship between adolescent fitness and fatness and cardiovascular disease risk factors in adulthood: The Aerobics Center Longitudinal Study (ACLS) (Eisenmann et al). 2005;149:46-53

Brachytherapy

Two-year clinical follow up of $^{90}\text{Sr}/^{90}\text{Y}$ β -radiation versus placebo control for the treatment of in-stent restenosis (Silber et al). 2005;149:689-94

Brain ischemia

Additional impact of electrocardiographic over echocardiographic diagnosis of left ventricular hypertrophy for predicting the risk of ischemic stroke (Kohsaka et al). 2005;149:181-6

Brain natriuretic peptide; see Natriuretic peptide, brain**Brazil**

Benign outcome in a long-term follow-up of patients with hypertrophic cardiomyopathy in Brazil (Arteaga et al). 2005;149:1099-05

C**C-reactive protein**

An acute inflammatory reaction induced by myocardial damage is superimposed on a chronic inflammation in unstable coronary artery disease (James et al). 2005;149:619-26

Atorvastatin has an important acute anti-inflammatory effect in patients with acute coronary syndrome: Results of a randomized, double-blind, placebo-controlled study (Macin et al). 2005;149:451-7

The biology, utilization, and attenuation of C-reactive protein in cardiovascular disease: Part I (Armani and Becker). 2005;149:971-6 (Progress cardiol.)

The biology, utilization, and attenuation of C-reactive protein in cardiovascular disease: Part II (Armani and Becker). 2005;149:977-83 (Progress cardiol.)

Cigarette smoking is associated with increased circulating proinflammatory and procoagulant markers in patients with chronic coronary artery disease: Effects of aspirin treatment (Ikonomidis et al). 2005;149:832-9

Multimarker risk strategy for predicting 1-month and 1-year major events in non-ST elevation acute coronary syndromes (Bodi et al). 2005;149:268-74

A perspective on the potential cardioprotective benefits of periodontal therapy (Offenbacher and Beck). 2005;149:950-4 (Editorial)

Statins in acute coronary syndromes: The sooner, the better? (Schwartz). 2005;149:377-80 (Editorial)

Stent implantation, but not pathogen burden, is associated with plasma C-reactive protein and interleukin-6 levels after percutaneous coronary intervention in patients with stable angina pectoris (Saleh et al). 2005;149:876-82

CABG; see Coronary artery bypass

Calcium

Diabetes and progression of coronary calcium under the influence of statin therapy (Budoff et al). 2005;149:695-700

Calcium antagonists; see Calcium channel blockers

Canada

Progression to chronic atrial fibrillation after the initial diagnosis of paroxysmal atrial fibrillation: Results from the Canadian Registry of Atrial Fibrillation (Kerr et al). 2005;149:489-96

Candesartan

The angiotensin II receptor blocker candesartan cilexetil reduces neointima proliferation after coronary stent implantation: A prospective randomized study under intravascular ultrasound guidance (Yoshida et al). 2005;149:144.e1-144.e6

The data monitoring experience in the Candesartan in Heart Failure Assessment of Reduction in Mortality and morbidity (CHARM) program (Pocock et al). 2005;149:939-43

Carbon

Prospective randomized comparison of early and late results of a carbonized stent versus a high-grade stainless steel stent of identical design: The Prevention of Recurrent Venous Thromboembolism (PREVENT) trial (Sick et al). 2005;149:681-8

Randomized comparison of carbon ion-implanted stent versus bare metal stent in coronary artery disease: The Asian Pacific Multicenter Arthos Stent Study (PASS) trial (Kim et al). 2005;149:336-41

Cardiac arrest; see Heart arrest

Cardiac catheterization; see Heart catheterization

Cardiac death; see Mortality

Cardiac pacing, artificial

Implantable cardioverter defibrillators and cardiac resynchronization therapy in patients with left ventricular dysfunction: Randomized trial evidence through 2004 (Al-Khatib et al). 2005;149:1020-34 (Meetings)

Predictors of response to cardiac resynchronization therapy (PROSPECT)-study design (Yu et al). 2005;149:600-5 (Trial design)

Cardiac rehabilitation

Impact of program duration and contact frequency on efficacy and cost of cardiac rehabilitation: Results of a randomized trial (Reid et al). 2005;149:862-8

Prevalence of metabolic syndrome in cardiac rehabilitation/secondary prevention programs (Savage et al). 2005;149:627-31

Cardiac resynchronization therapy

Implantable cardioverter defibrillators and cardiac resynchronization therapy in patients with left ventricular dysfunction: Randomized trial evidence through 2004 (Al-Khatib et al). 2005;149:1020-34 (Meetings)

Predictors of response to cardiac resynchronization therapy (PROSPECT)-study design (Yu et al). 2005;149:600-5 (Trial design)

Cardiac volume

Left atrial volumetric remodeling is predictive of functional capacity in nonobstructive hypertrophic cardiomyopathy (Sachdev et al). 2005;149:730-6

Cardiogenic shock; see Shock, cardiogenic

Cardiology

Genetic association studies in cardiology (Donahue and Allen). 2005;149:964-70 (Progress cardiol.)

Which role for multislice computed tomography in clinical cardiology? (Bax and Schuijf). 2005;149:960-1 (Editorial)

Cardiomyopathy

An acute inflammatory reaction induced by myocardial damage is superimposed on a chronic inflammation in unstable coronary artery disease (James et al). 2005;149:619-26

Diagnostic approach to the patient with cardiomyopathy: Whom to biopsy (Ardehali et al). 2005;149:7-12 (Curriculum cardiol.)

Cardiomyopathy, hypertrophic

Benign outcome in a long-term follow-up of patients with hypertrophic cardiomyopathy in Brazil (Arteaga et al). 2005;149:1099-05

Left atrial volumetric remodeling is predictive of functional capacity in nonobstructive hypertrophic cardiomyopathy (Sachdev et al). 2005;149:730-6

Cardioprotection

Cardioprotection before revascularization in ischemic myocardial injury and the potential role of hemoglobin-based oxygen carriers (Burkhoff and Lefer). 2005;149:573-9 (Progress cardiol.)

A perspective on the potential cardioprotective benefits of periodontal therapy (Offenbacher and Beck). 2005;149:950-4 (Editorial)

Cardiopulmonary resuscitation

Factors associated with an increased chance of survival among patients suffering from an out-of-hospital cardiac arrest in a national perspective in Sweden (Herlitz et al). 2005;149:61-6

Cardiorespiratory fitness; see Physical fitness

Cardiovascular diseases

The biology, utilization, and attenuation of C-reactive protein in cardiovascular disease: Part I (Armani and Becker). 2005;149:971-6 (Progress cardiol.)

The biology, utilization, and attenuation of C-reactive protein in cardiovascular disease: Part II (Armani and Becker). 2005;149:977-83 (Progress cardiol.)

Cardiovascular disease in Latin America (Medina-Lezama et al). 2005;149:e13 (Letter)

Ethnic differences in cardiovascular risk factor burden among middle-aged women: Study of Women's Health Across the Nation (SWAN) (Matthews et al). 2005;149:1066-73

- Implantable cardioverter defibrillators and cardiac resynchronization therapy in patients with left ventricular dysfunction: Randomized trial evidence through 2004 (Al-Khatib et al). 2005;149:1020-34 (Meetings)

Delayed-action preparations

- Efficacy, safety and tolerability of metoprolol CR/XL in patients with diabetes and chronic heart failure: Experiences from MERIT-HF (Deedwania et al). 2005;149:159-67

Demography

- Asymptomatic atrial fibrillation: Demographic features and prognostic information from the Atrial Fibrillation Follow-up Investigation of Rhythm Management (AFFIRM) study (Flaker et al). 2005;149:657-63
- Systolic hypertension: An overview (Griffith et al). 2005;149:769-75 (Meetings)

Dental care

- Periodontal treatment improves endothelial dysfunction in patients with severe periodontitis (Seinost et al). 2005;149:1050-4

- A perspective on the potential cardioprotective benefits of periodontal therapy (Offenbacher and Beck). 2005;149:950-4 (Editorial)

Depression

- Concerns about the implantable cardioverter defibrillator: A determinant of anxiety and depressive symptoms independent of experienced shocks (Pedersen et al). 2005;149:664-9
- Depression and heart failure in patients with a new myocardial infarction (Powell et al). 2005;149:851-5
- Heart rate variability biofeedback as a behavioral neurocardiac intervention to enhance vagal heart rate control (Nolan et al). 2005;149:1137.e1-1137.e7

Diabetes mellitus

- Chromium supplementation shortens QTc interval duration in patients with type 2 diabetes mellitus (Vrtovc et al). 2005;149:632-6
- The Coronary Artery Revascularisation in Diabetes (CARDia) trial: Background, aims, and design (Kapur et al). 2005;149:13-19 (Trial design)
- Diabetes and progression of coronary calcium under the influence of statin therapy (Budoff et al). 2005;149:695-700
- Effects of abciximab and preprocedural glycemic control in diabetic patients undergoing elective coronary stenting (De Luca et al). 2005;149:1135.e11-1135.e18
- Efficacy, safety and tolerability of metoprolol CR/XL in patients with diabetes and chronic heart failure: Experiences from MERIT-HF (Deedwania et al). 2005;149:159-67
- Fluvastatin reduces the impact of diabetes on long-term outcome after coronary intervention-A Lescot Intervention Prevention Study (LIPS) substudy (Arampatzis et al). 2005;149:329-35
- Impact of physicians' beliefs and practices on cholesterol levels in patients with type 2 diabetes: A longitudinal assessment (Franciosi et al). 2005;149:104-11
- Insulin-treated diabetes is associated with a marked increase in mortality in patients with advanced heart failure (Smooke et al). 2005;149:168-74
- Microalbuminuria: A strong predictor of 3-year adverse prognosis in nondiabetic patients with acute myocardial infarction (Koulouris et al). 2005;149:840-5
- Rationale-Trial to Reduce Cardiovascular Events with Aranesp Therapy (TREAT): Evolving the management of cardiovascular risk in patients with chronic kidney disease (Mix et al). 2005;149:408-13 (Trial design)
- Revascularization of coronary atherosclerosis in patients with diabetes mellitus-There is more to it than meets the image intensifier (Petersen and Harrington). 2005;149:190-3 (Editorial)
- Risk reduction of cardiac events by screening of unknown asymptomatic coronary artery disease in subjects with type 2 diabetes mellitus at high cardiovascular risk: An open-label randomized pilot study (Faglia et al). 2005;149:283.e1-283.e6
- Screening for heart disease in diabetic subjects (Fang et al). 2005;149:349-54
- Diastole**
- Determinants of functional capacity in patients with chronic heart failure: Role of filling pressure and systolic and diastolic function (Smart et al). 2005;149:152-8
- A Doppler-derived index of combined left ventricular systolic and diastolic function is an independent predictor of cardiovascular mortality in elderly men (Ärnlöv et al). 2005;149:902-7
- Diet, sodium-restricted**
- Diet and blood pressure: Applying the evidence to clinical practice (Ard and Svetkey). 2005;149:804-12 (Meetings)

Diet therapy

Diet and blood pressure: Applying the evidence to clinical practice (Ard and Svetkey). 2005;149:804-12 (Meetings)

Dietary supplements

Should we routinely supplement coronary patients with folate therapy to prevent in-stent restenosis? (Halabi and Harrington). 2005;149:1035-6

Diltiazem

Efficacy and safety of a once-daily graded-release diltiazem formulation dosed at bedtime compared to placebo and to morning dosing in chronic stable angina pectoris (Glasser et al). 2005;149:290.e1-290.e9

Disease classification

A critical appraisal of current models of risk stratification for percutaneous coronary interventions (Singh et al). 2005;149:753-60 (Curriculum cardiol.)

Disease management

Barriers to hypertension control (Borzecki et al). 2005; 149:785-94 (Meetings)

Evaluation and management of patients with uncontrolled systolic hypertension: Is another new paradigm really needed? (Mitchell and Pfeffer). 2005;149:776-84 (Meetings)

Impact of invasive management versus noninvasive management on functional status and quality of life following non-Q-wave myocardial infarction: A randomized clinical trial (Eisenberg et al). 2005;149:813-19

Intensity and focus of heart failure disease management after hospital discharge (Shah et al). 2005;149:715-21

Metaanalysis and review of heart failure disease management randomized controlled clinical trials (Whellan et al). 2005;149:722-9

Disease progression

Diabetes and progression of coronary calcium under the influence of statin therapy (Budoff et al). 2005;149:695-700

New-onset paroxysmal atrial fibrillation: Is permanence inevitable? (Patton and Page). 2005;149:388-90 (Editorial)

Progression to chronic atrial fibrillation after the initial diagnosis of paroxysmal atrial fibrillation: Results from the Canadian Registry of Atrial Fibrillation (Kerr et al). 2005;149:489-96

Dobutamine

Left ventricular outflow tract obstruction provoked during dobutamine stress echocardiography predicts future chest pain, syncope, and near syncope (Dawn et al). 2005;149:908-16

Dose-response relationship, drug

Comparison of the efficacy and safety of atorvastatin initiated at different starting doses in patients with dyslipidemia (Jones et al). 2005;149:111.e1-111.e8

Dose-comparison study of the combination of ezetimibe and simvastatin (Vytorin) versus atorvastatin in patients with hypercholesterolemia: The Vytorin Versus Atorvastatin (VYVA) Study (Ballantyne et al). 2005;149:464-73

To the Editor (Nagge et al) (Letter); (Kruse and Lee) (Reply). 2005;149:e21, e23-e24

Efficacy and safety of a once-daily graded-release diltiazem formulation dosed at bedtime compared to placebo and to morning dosing in chronic stable angina pectoris (Glasser et al). 2005;149:290.e1-290.e9

Statins in acute coronary syndromes: The sooner, the better? (Schwartz). 2005;149:377-80 (Editorial)

Drug administration schedule

Efficacy and safety of a once-daily graded-release diltiazem formulation dosed at bedtime compared to placebo and to morning dosing in chronic stable angina pectoris (Glasser et al). 2005;149:290.e1-290.e9

Statins in acute coronary syndromes: The sooner, the better? (Schwartz). 2005;149:377-80 (Editorial)

Drug combinations

Clopidogrel-aspirin combination for atrial fibrillation: CLAAF is not CLEAR (Jackson et al) (Letter); (De Caterina and Lorenzoni) (Reply). 2005;149(1):e3, e4

Comparison of ezetimibe plus simvastatin versus simvastatin monotherapy on atherosclerosis progression in familial hypercholesterolemia: Design and rationale of the Ezetimibe and Simvastatin in Hypercholesterolemia Enhances Atherosclerosis Regression (ENHANCE) trial (Kastelein et al). 2005;149:234-9 (Trial design)

Dose-comparison study of the combination of ezetimibe and simvastatin (Vytorin) versus atorvastatin in patients with hypercholesterolemia: The Vytorin Versus Atorvastatin (VYVA) Study (Ballantyne et al). 2005;149:464-73

Effect of clopidogrel plus aspirin on tissue perfusion and coronary flow in patients with ST-segment elevation myocardial infarction: A new reperfusion strategy (Dogan et al). 2005;149:1037-42

Is atorvastatin more appropriate to use in combination with niacin than simvastatin in patients with the metabolic syndrome? (Al-Shahr). 2005;149:e17 (Letter)

Regarding antithrombotic treatment after coronary stenting in patients on chronic oral anticoagulation (Rubboli et al). 2005;149(2):e1 (Letter)

Drug resistance

The role of platelet glycoprotein IIIa polymorphism in the high prevalence of in vitro aspirin resistance in patients with intracoronary stent restenosis (Pamukcu et al). 2005;149:675-80

Drug utilization

Practical considerations of β -blockade in the management of the post-myocardial infarction patient (Fonarow). 2005;149:984-93 (Curriculum cardiol.)

Why do patients fail to receive β -blockers for chronic heart failure over time? A "real-world" single-center, 2-year follow-up experience of β -blocker therapy in patients with chronic heart failure (Parameswaran et al). 2005;149:921-6

Dyslipidemia; *see* Hyperlipidemia

E

ECG; *see* Electrocardiography

Echocardiography

Additional impact of electrocardiographic over echocardiographic diagnosis of left ventricular hypertrophy for predicting the risk of ischemic stroke (Kohsaka et al). 2005;149:181-6

Assessment of left ventricular mass using echocardiography: Use of fundamental imaging (Mansencal and Dubourg) (Letter); (Kohsaka and Di Tullio) (Reply). 2005;149:e29, e31

Impact of cardioversion strategy on functional capacity in patients with atrial fibrillation: The Assessment of Cardioversion Using Transesophageal Echocardiography (ACUTE) Study (Jasper et al). 2005;149:309-15

Myocardial contrast echocardiography accurately reflects transmural of myocardial necrosis and predicts contractile reserve after acute myocardial infarction (Janardhanan et al). 2005;149:355-62

Predictors of response to cardiac resynchronization therapy (PROSPECT)-study design (Yu et al). 2005;149:600-5 (Trial design)

Echocardiography, Doppler

Determinants of functional capacity in patients with chronic heart failure: Role of filling pressure and systolic and diastolic function (Smart et al). 2005;149:152-8

A Doppler-derived index of combined left ventricular systolic and diastolic function is an independent predictor of cardiovascular mortality in elderly men (Årnlöv et al). 2005;149:902-7

Echocardiography, stress

Assessment of patients with low-risk chest pain in the emergency department: Head-to-head comparison of exercise stress echocardiography and exercise myocardial SPECT (Conti et al). 2005;149:894-901

Left ventricular outflow tract obstruction provoked during dobutamine stress echocardiography predicts future chest pain, syncope, and near syncope (Dawn et al). 2005;149:908-16

Marked differences between patients referred for stress echocardiography and myocardial perfusion imaging studies (Bart et al). 2005;149:888-93

Editorials

Acute coronary syndrome statistics: What you don't see can hurt you (Rajagopal and Bhatt). 2005;149:955-6

Atrial fibrillation and quality of life: Clarity or evidence-based confusion? (Newman). 2005;149:4-6

Conflict of interest for the physician-inventor using a device in human subjects (Popp). 2005;149:1-3

Enhancing reperfusion therapy for myocardial infarction with dual antiplatelet therapy: Breaking the glass ceiling (Fathi and Bhatt). 2005;149:947-9

Improvements in quality improvement (Roe and Peterson). 2005;149:751-2

Morpheus, God of sleep or God of Death? (Verheugt). 2005;149:945-6

New-onset paroxysmal atrial fibrillation: Is permanence inevitable? (Patton and Page). 2005;149:388-90

A perspective on the potential cardioprotective benefits of periodontal therapy (Offenbacher and Beck). 2005;149:950-4

Plaque regression-A new target for antiatherosclerotic therapy (Karha and Bhatt). 2005;149:384-7

Rate control versus rhythm control: Choose your poison (Passman and Kadish). 2005;149:957-9

Revascularization of coronary atherosclerosis in patients with diabetes mellitus-There is more to it than meets the image intensifier (Petersen and Harrington). 2005;149:190-3

Should we aggressively treat elderly patients with cardiogenic shock? (Hasdai). 2005;149:962-3

Statin therapy—Time to turn the focus from efficacy to implementation? (Blazing). 2005;149:381-3

Statins in acute coronary syndromes: The sooner, the better? (Schwartz). 2005;149:377-80

Unexpected BNP levels in patients with advanced heart failure: A tale of caution and promise (Drazner and de Lemos). 2005;149:187-9

Which role for multislice computed tomography in clinical cardiology? (Bax and Schuijf). 2005;149:960-1

Education, medical

Renal and iliac artery stenting by interventional cardiologists and vascular surgeons: The Foundation to Advance Medical Education (FAME) initiative (Holmes, Jr et al). 2005;149:883-7

Ejection fraction; see Stroke volume**Elderly; see Aged****Electric countershock**

Comparative efficacy of monophasic and biphasic waveforms for transthoracic cardioversion of atrial fibrillation and atrial flutter (Gurevitz et al). 2005;149:316-21

Concerns about the implantable cardioverter defibrillator: A determinant of anxiety and depressive symptoms independent of experienced shocks (Pedersen et al). 2005;149:664-9

Impact of cardioversion strategy on functional capacity in patients with atrial fibrillation: The Assessment of Cardioversion Using Transesophageal Echocardiography (ACUTE) Study (Jasper et al). 2005;149:309-15

Rate control versus rhythm control: Choose your poison (Passman and Kadish). 2005;149:957-9 (Editorial)

Rate control versus rhythm control for patients with persistent atrial fibrillation with mild to moderate heart failure: Results from the Rate Control versus Electrical Cardioversion (RACE) study (Hagens et al). 2005;149:1106-11

Electrical cardioversion; see Electric countershock**Electrocardiography**

Additional impact of electrocardiographic over echocardiographic diagnosis of left ventricular hypertrophy for predicting the risk of ischemic stroke (Kohsaka et al). 2005;149:181-6

Chromium supplementation shortens QTc interval duration in patients with type 2 diabetes mellitus (Vrtovc et al). 2005;149:632-6

To the Editor (Spodick) (Letter); (Gami et al) (Reply). 2005;149:e9, e11

Effect of coronary artery bypass grafting and aneurysmectomy on QT dispersion in moderate or severe left ventricular dysfunction (Gulcan et al). 2005;149:917-20

Electrocardiographic damage scores and cardiovascular mortality (Richardson et al). 2005;149:458-63

Electrocardiographic diagnosis of left ventricular hypertrophy: The effect of left ventricular thickness, size, and mass on the specific criteria for left ventricular hypertrophy (Budhwani et al). 2005;149:709-14

Incremental prognostic value of exercise single-photon emission computed tomographic (SPECT) thallium 201 imaging in patients with ST-T abnormalities on their resting electrocardiograms (Kwok et al). 2005;149:145-51

ST resolution in a single electrocardiographic lead: A simple and accurate predictor of cardiac mortality in patients with fibrinolytic therapy for acute ST-elevation myocardial infarction (Zeymer et al). 2005;149:91-7

Electron beam tomography; see Tomography, x-ray computed**Embolism**

Embolic protection during saphenous vein graft intervention using a second-generation balloon protection device-Results from the combined US and European pilot study of the TriActiv Balloon Protected Flush Extraction System (Carrozza, Jr et al). 2005;149:1136.e1-1136.e7

Emergency medicine

Assessment of patients with low-risk chest pain in the emergency department: Head-to-head comparison of exercise stress echocardiography and exercise myocardial SPECT (Conti et al). 2005;149:894-901

Impact of the application of the American College of Emergency Physicians recommendations for the admission of patients with syncope on a retrospectively studied population presenting to the emergency department (Elesber et al). 2005;149:826-31

Outcome of patients aged ≥ 75 years in the SHould we emergently revascularize Occluded Coronaries in cardiogenic shock (SHOCK) trial: Do elderly patients with acute myocardial infarction complicated by cardiogenic shock respond differently to emergent revascularization? (Dzavik et al). 2005;149:1128-34

Endomyocardial biopsy; see Biopsy

Endothelins

Carvedilol therapy is associated with a sustained decline in brain natriuretic peptide levels in patients with congestive heart failure (Frantz et al). 2005;149:541-7

Endothelium, vascular

Early effects of statin therapy on endothelial function and microvascular reactivity in patients with coronary artery disease (Ling et al). 2005;149:1137.e9-1137.e16

Exercise as an alternative to oral estrogen for amelioration of endothelial dysfunction in postmenopausal women (Harvey et al). 2005;149:291-7

Lipid-independent effects of statins on endothelial function and bioavailability of nitric oxide in hypercholesterolemic patients (John et al). 2005;149:473.e1-473.e10

Periodontal treatment improves endothelial dysfunction in patients with severe periodontitis (Seinost et al). 2005;149:1050-4

A perspective on the potential cardioprotective benefits of periodontal therapy (Offenbacher and Beck). 2005;149:950-4 (Editorial)

Energy metabolism

Metabolic syndrome: Definition, pathophysiology, and mechanisms (Miranda et al). 2005;149:33-45

Enoxaparin

Economic analysis of the Assessment of the Safety and Efficacy of a New Thrombolytic Regimen (ASSENT-3) study: Costs of reperfusion strategies in acute myocardial infarction (Kaul et al). 2005;149:637-44

To the Editor (Nagge et al) (Letter); (Kruse and Lee) (Reply). 2005;149:e21, e23-e24

Enoxaparin versus unfractionated heparin as antithrombin therapy in patients receiving fibrinolysis for ST-elevation myocardial infarction: Design and rationale for the Enoxaparin and Thrombolysis Reperfusion for Acute Myocardial Infarction Treatment-Thrombolysis In Myocardial Infarction study 25 (ExTRACT-TIMI 25) (Antman et al). 2005;149:217-26 (Trial design)

Epidemiology

Systolic hypertension: An overview (Griffith et al). 2005;149:769-75 (Meetings)

Eptifibatide

The Early Glycoprotein IIb/IIIa Inhibition in Non-ST-Segment Elevation Acute Coronary Syndrome (EARLY ACS) trial: A randomized placebo-controlled trial evaluating the clinical benefits of early front-loaded eptifibatide in the treatment of patients with non-ST-segment elevation acute coronary syndrome—Study design and rationale (Giugliano et al). 2005;149:994-1002 (Trial design)

Elective percutaneous coronary intervention using broad-spectrum antiplatelet therapy (eptifibatide, clopidogrel, and aspirin) alone, without scheduled unfractionated heparin or other antithrombin therapy (Denardo et al). 2005;149:138-44

Equipment and supplies

Conflict of interest for the physician-inventor using a device in human subjects (Popp). 2005;149:1-3 (Editorial)

Erythrocyte aggregation

Erythrocyte adhesiveness/aggregation: A novel biomarker for the detection of low-grade internal inflammation in individuals with atherothrombotic risk factors and proven vascular disease (Berliner et al). 2005;149:260-7

Estrogen

Exercise as an alternative to oral estrogen for amelioration of endothelial dysfunction in postmenopausal women (Harvey et al). 2005;149:291-7

Ethics, medical

Conflict of interest for the physician-inventor using a device in human subjects (Popp). 2005;149:1-3 (Editorial)

Ethnic groups

Ethnic differences in cardiovascular risk factor burden among middle-aged women: Study of Women's Health Across the Nation (SWAN) (Matthews et al). 2005;149:1066-73

Racial differences in reperfusion therapy use in patients hospitalized with myocardial infarction: A regional phenomenon (Rathore et al). 2005;149:1074-81

Evidence-based medicine

Atrial fibrillation and quality of life: Clarity or evidence-based confusion? (Newman). 2005;149:4-6 (Editorial)

Diet and blood pressure: Applying the evidence to clinical practice (Ard and Svetkey). 2005;149:804-12 (Meetings)

Statin therapy—Time to turn the focus from efficacy to implementation? (Blazing). 2005;149:381-3 (Editorial)

Exercise test

Assessment of patients with low-risk chest pain in the emergency department: Head-to-head comparison of exercise stress echocardiography and exercise myocardial SPECT (Conti et al). 2005;149:894-901

Exercise treadmill testing using a modified exercise protocol in women with suspected myocardial ischemia: Findings from the National Heart, Lung and Blood Institute-sponsored Women's Ischemia Syndrome Evaluation (WISE) (Lewis et al). 2005;149:527-33

Incremental prognostic value of exercise single-photon emission computed tomographic (SPECT) thallium 201 imaging in patients with ST-T abnormalities on their resting electrocardiograms (Kwok et al). 2005;149:145-51

Oxygen uptake efficiency slope, a new submaximal parameter in evaluating exercise capacity in chronic heart failure patients (Van Laethem et al). 2005;149:175-80

Prediction of death or myocardial infarction by exercise single photon emission computed tomography perfusion scintigraphy in patients who have had recent coronary artery stenting (Rajagopal et al). 2005;149:534-40

Exercise therapy

An alternative approach for exercise prescription and efficacy testing in patients with chronic heart failure: A randomized controlled training study (Meyer et al). 2005;149:926.e1-926.e7

Exercise as an alternative to oral estrogen for amelioration of endothelial dysfunction in postmenopausal women (Harvey et al). 2005;149:291-7

Exercise tolerance

Effects of angiotensin-converting enzyme inhibitor plus irbesartan on maximal and submaximal exercise capacity and neurohumoral activation in patients with congestive heart failure (Blanchet et al). 2005;149:938.e1-938.e7

Left atrial volumetric remodeling is predictive of functional capacity in nonobstructive hypertrophic cardiomyopathy (Sachdev et al). 2005;149:730-6

Ezetimibe

Comparison of ezetimibe plus simvastatin versus simvastatin monotherapy on atherosclerosis progression in familial hypercholesterolemia: Design and rationale of the Ezetimibe and Simvastatin in Hypercholesterolemia Enhances Atherosclerosis Regression (ENHANCE) trial (Kastelein et al). 2005;149:234-9 (Trial design)

Dose-comparison study of the combination of ezetimibe and simvastatin (Vytorin) versus atorvastatin in patients with hypercholesterolemia: The Vytorin Versus Atorvastatin (VYVA) Study (Ballantyne et al). 2005;149:464-73

F

Heart arrest

- Factors associated with an increased chance of survival among patients suffering from an out-of-hospital cardiac arrest in a national perspective in Sweden (Herlitz et al). 2005;149:61-6

Heart atria

- Left atrial volumetric remodeling is predictive of functional capacity in nonobstructive hypertrophic cardiomyopathy (Sachdev et al). 2005;149:730-6

Heart block

- Incidence, predictors, and outcomes of high-degree atrioventricular block complicating acute myocardial infarction treated with thrombolytic therapy (Meine et al). 2005;149:670-4

Heart catheterization

- Early cardiac catheterization is associated with lower mortality only among high-risk patients with ST- and non-ST-elevation acute coronary syndromes: Observations from the OPUS-TIMI 16 trial (Cantor et al). 2005;149:275-83
- Invasive versus noninvasive management of ST-elevation acute myocardial infarction: A review of clinical trials and observational studies (Beck et al). 2005;149:194-9 (Curriculum cardiol.)
- Transseptal left heart catheterization as an alternative to retrograde left ventricular catheterization for patients with aortic stenosis (Cheng). 2005;149:e15 (Letter)

Heart diseases

Screening for heart disease in diabetic subjects (Fang et al). 2005;149:349-54

Heart failure, congestive

B-type natriuretic peptide levels are not a surrogate marker for invasive hemodynamics during management of patients with severe heart failure (O'Neill et al). 2005;149:363-9

Characteristics and outcomes of patients hospitalized for heart failure in the United States: Rationale, design, and preliminary observations from the first 100,000 cases in the Acute Decompensated Heart Failure National Registry (ADHERE) (Adams Jr. et al). 2005;149:209-16 (Trial design)

Depression and heart failure in patients with a new myocardial infarction (Powell et al). 2005;149:851-5

Determinants of functional capacity in patients with chronic heart failure: Role of filling pressure and systolic and diastolic function (Smart et al). 2005;149:152-8

Effect of body mass index on natriuretic peptide levels in patients with acute congestive heart failure: A ProBNP Investigation of Dyspnea in the Emergency Department (PRIDE) substudy (Krauser et al). 2005;149:744-50

Hypothermia is a bedside predictor of imminent death in patients with congestive heart failure (Casscells et al). 2005;149:927-33

Insulin-treated diabetes is associated with a marked increase in mortality in patients with advanced heart failure (Smooke et al). 2005;149:168-74

Intensity and focus of heart failure disease management after hospital discharge (Shah et al). 2005;149:715-21

Metaanalysis and review of heart failure disease management randomized controlled clinical trials (Whellan et al). 2005;149:722-9

Oxygen uptake efficiency slope, a new submaximal parameter in evaluating exercise capacity in chronic heart failure patients (Van Laethem et al). 2005;149:175-80

Patients with heart failure who die in hospice (Zambroski et al). 2005;149:558-64

A polymorphism of the endothelial nitric oxide synthase promoter is associated with an increase in autonomic imbalance in patients with congestive heart failure (Binkley et al). 2005;149:342-8

Prevalence of anemia and effects on mortality in patients with heart failure (Lindenfeld). 2005;149:391-401 (Curriculum cardiol.)

Sex, quality of care, and outcomes of elderly patients hospitalized with heart failure: Findings from the National Heart Failure Project (Rathore et al). 2005;149:121-8

Unexpected BNP levels in patients with advanced heart failure: A tale of caution and promise (Drazner and de Lemos). 2005;149:187-9 (Editorial)

Heart failure, congestive, drug therapy

Carvedilol therapy is associated with a sustained decline in brain natriuretic peptide levels in patients with congestive heart failure (Frantz et al). 2005;149:541-7

The data monitoring experience in the Candesartan in Heart Failure Assessment of Reduction in Mortality and morbidity ~ (CHARM) program (Pocock et al). 2005;149:939-43

Effects of angiotensin-converting enzyme inhibitor plus irbesartan on maximal and submaximal exercise capacity and neurohumoral activation in patients with congestive heart failure (Blanchet et al). 2005;149:938.e1-938.e7

Effects of metoprolol and carvedilol on cause-specific mortality and morbidity in patients with chronic heart failure—COMET (Torp-Pedersen et al). 2005;149:370-6

Efficacy, safety and tolerability of metoprolol CR/XL in patients with diabetes and chronic heart failure: Experiences from MERIT-HF (Deedwania et al). 2005;149:159-67

A propensity score analysis of the impact of angiotensin-converting enzyme inhibitors on long-term survival of older adults with heart failure and perceived contraindications (Ahmed et al). 2005;149:737-43

Rate control versus rhythm control: Choose your poison (Passman and Kadish). 2005;149:957-9 (Editorial)

Rate control versus rhythm control for patients with persistent atrial fibrillation with mild to moderate heart failure: Results from the RATE Control versus Electrical cardioversion (RACE) study (Hagens et al). 2005;149:1106-11

Valsartan reduces the incidence of atrial fibrillation in patients with heart failure: Results from the Valsartan Heart Failure Trial (Val-HeFT) (Maggioni et al). 2005;149:548-57

Why do patients fail to receive β -blockers for chronic heart failure over time? A "real-world" single-center, 2-year follow-up experience of β -blocker therapy in patients with chronic heart failure (Parameswaran et al). 2005;149:921-6

Heart failure, congestive, therapy

An alternative approach for exercise prescription and efficacy testing in patients with chronic heart failure: A randomized controlled training study (Meyer et al). 2005;149:926.e1-926.e7

Predictors of response to cardiac resynchronization therapy (PROSPECT)—study design (Yu et al). 2005;149:600-5 (Trial design)

Rate control versus rhythm control for patients with persistent atrial fibrillation with mild to moderate heart failure: Results from the RATE Control versus Electrical cardioversion (RACE) study (Hagens et al). 2005;149:1106-11

Heart rate

Atrial fibrillation and quality of life: Clarity or evidence-based confusion? (Newman). 2005;149:4-6 (Editorial)

Clinical factors associated with abandonment of a rate-control or a rhythm-control strategy for the management of atrial fibrillation in the AFFIRM study (Curtis et al). 2005;149:304-8

Clinical factors that influence response to treatment strategies in atrial fibrillation: The Atrial Fibrillation Follow-up Investigation of Rhythm Management (AFFIRM) Study (AFFIRM Investigators). 2005;149:645-9

Heart rate variability biofeedback as a behavioral neurocardiac intervention to enhance vagal heart rate control (Nolan et al). 2005;149:1137.e1-1137.e7

Quality of life in atrial fibrillation: The Atrial Fibrillation Follow-up Investigation of Rhythm Management (AFFIRM) study (AFFIRM Investigators). 2005;149:112-20

Rate control versus rhythm control: Choose your poison (Passman and Kadish). 2005;149:957-9 (Editorial)

Rate control versus rhythm control for patients with persistent atrial fibrillation with mild to moderate heart failure: Results from the RATE Control versus Electrical cardioversion (RACE) study (Hagens et al). 2005;149:1106-11

Heart septum

Transseptal left heart catheterization as an alternative to retrograde left ventricular catheterization for patients with aortic stenosis (Cheng). 2005;149:e15 (Letter)

Heart ventricles

Transseptal left heart catheterization as an alternative to retrograde left ventricular catheterization for patients with aortic stenosis (Cheng). 2005;149:e15 (Letter)

Hematocrit

Noninvasive evaluation of pericardial effusion composition by computed tomography (Rifkin et al). 2005;149:1120-7

Hemodialysis

Potential antiatherogenic and anti-inflammatory properties of sevelamer in maintenance hemodialysis patients (Ferramosca et al). 2005;149:820-5

Hemodynamics

B-type natriuretic peptide levels are not a surrogate marker for invasive hemodynamics during management of patients with severe heart failure (O'Neill et al). 2005;149:363-9

Unexpected BNP levels in patients with advanced heart failure: A tale of caution and promise (Drazner and de Lemos). 2005;149:187-9 (Editorial)

Hemoglobin-based oxygen carriers (HBOCs);

see Hemoglobins

Hemoglobins

Cardioprotection before revascularization in ischemic myocardial injury and the potential role of hemoglobin-based oxygen carriers (Burkhoff and Lefer). 2005;145:573-9 (Progress cardiol.)

Hemorrhage

To the Editor (Nagge et al) (Letter); (Kruse and Lee) (Reply). 2005;149:e21, e23-e24

Factors affecting bleeding risk during anticoagulant therapy in patients with atrial fibrillation: Observations from the Atrial Fibrillation Follow-up Investigation of Rhythm Management (AFFIRM) Study (DiMarco et al). 2005;149:650-6

The relation of renal function to ischemic and bleeding outcomes with 2 different glycoprotein IIb/IIIa inhibitors: The Do Tirofiban and ReoPro Give Similar Efficacy Outcome (TARGET) trial (Berger et al). 2005;149:869-75

Heparin

Economic analysis of the Assessment of the Safety and Efficacy of a New Thrombolytic Regimen (ASSENT-3) study: Costs of reperfusion strategies in acute myocardial infarction (Kaul et al). 2005;149:637-44

To the Editor (Nagge et al) (Letter); (Kruse and Lee) (Reply). 2005;149:e21, e23-e24

Elective percutaneous coronary intervention using broad-spectrum antiplatelet therapy (eptifibatide, clopidogrel, and aspirin) alone, without scheduled unfractionated heparin or other antithrombin therapy (Denardo et al). 2005;149:138-44

Enoxaparin versus unfractionated heparin as antithrombin therapy in patients receiving fibrinolysis for ST-elevation myocardial infarction: Design and rationale for the Enoxaparin and Thrombolysis Reperfusion for Acute Myocardial Infarction Treatment-Thrombolysis In Myocardial Infarction study 25 (ExTRACT-TIMI 25) (Antman et al). 2005;149:217-26 (Trial design)

Homocysteine

Multimarker risk strategy for predicting 1-month and 1-year major events in non-ST elevation acute coronary syndromes (Bodi et al). 2005;149:268-74

Hospice care

Patients with heart failure who die in hospice (Zambroski et al). 2005;149:558-64

Hospital mortality; see Mortality**Hospitalization**

Characteristics and outcomes of patients hospitalized for heart failure in the United States: Rationale, design, and preliminary observations from the first 100,000 cases in the Acute Decompensated Heart Failure National Registry (ADHERE) (Adams Jr. et al). 2005;149:209-16 (Trial design)

Efficacy, safety and tolerability of metoprolol CR/XL in patients with diabetes and chronic heart failure: Experiences from MERIT-HF (Deedwania et al). 2005;149:159-67

Metaanalysis and review of heart failure disease management randomized controlled clinical trials (Whellan et al). 2005;149:722-9

Sex, quality of care, and outcomes of elderly patients hospitalized with heart failure: Findings from the National Heart Failure Project (Rathore et al). 2005;149:121-8

Hospitals

Hospital therapy traditions influence long-term survival in patients with acute myocardial infarction (Stenestrand et al). 2005;149:82-90

Hydroxymethylglutaryl-CoA reductase inhibitors

The biology, utilization, and attenuation of C-reactive protein in cardiovascular disease: Part II (Armani and Becker). 2005;149:977-83 (Progress cardiol.)

Diabetes and progression of coronary calcium under the influence of statin therapy (Budoff et al). 2005;149:695-700

Early effects of statin therapy on endothelial function and microvascular reactivity in patients with coronary artery disease (Ling et al). 2005;149:1137.e9-1137.e16

Lipid-independent effects of statins on endothelial function and bioavailability of nitric oxide in hypercholesterolemic patients (John et al). 2005;149:473.e1-473.e10

Plaque regression—A new target for antiatherosclerotic therapy (Karha and Bhatt). 2005;149:384-7 (Editorial)

Statin therapy—Time to turn the focus from efficacy to implementation? (Blazing). 2005;149:381-3 (Editorial)

Statins in acute coronary syndromes: The sooner, the better? (Schwartz). 2005;149:377-80 (Editorial)

Hypercholesterolemia

Dose-comparison study of the combination of ezetimibe and simvastatin (Vytorin) versus atorvastatin in patients with hypercholesterolemia: The Vytorin Versus Atorvastatin (VYVA) Study (Ballantyne et al). 2005;149:464-73

Lipid-independent effects of statins on endothelial function and bioavailability of nitric oxide in hypercholesterolemic patients (John et al). 2005;149:473.e1-473.e10

Hypercholesterolemia, familial

Comparison of ezetimibe plus simvastatin versus simvastatin monotherapy on atherosclerosis progression in familial hypercholesterolemia: Design and rationale of the Ezetimibe and Simvastatin in Hypercholesterolemia Enhances Atherosclerosis Regression (ENHANCE) trial (Kastelein et al). 2005;149:234-9 (Trial design)

Hyperglycemia

Effects of abxcimab and preprocedural glycemic control in diabetic patients undergoing elective coronary stenting (De Luca et al). 2005;149:1135.e11-1135.e18

Hyperlipidemia

Comparison of the efficacy and safety of atorvastatin initiated at different starting doses in patients with dyslipidemia (Jones et al). 2005;149:111.e1-111.e8

Metabolic syndrome: Definition, pathophysiology, and mechanisms (Miranda et al). 2005;149:33-45

Hyperoxemia

Attenuation of reperfusion microvascular ischemia by aqueous oxygen: Experimental and clinical observations (Glazier). 2005;149:580-4 (Progress cardiol.)

Hyperplasia

Simvastatin does not inhibit intimal hyperplasia and restenosis but promotes plaque regression in normocholesterolemic patients undergoing coronary stenting: A randomized study with intravascular ultrasound (Petroneio et al). 2005;149:520-6

Hypertension

- Barriers to hypertension control (Borzecki et al). 2005;149:785-94 (Meetings)
- Blood pressure variability and prognosis in uncomplicated mild hypertension (Pierdomenico et al). 2005;149:93-48
- Diet and blood pressure: Applying the evidence to clinical practice (Ard and Svetkey). 2005;149:804-12 (Meetings)
- Evaluation and management of patients with uncontrolled systolic hypertension: Is another new paradigm really needed? (Mitchell and Pfeffer). 2005;149:776-84 (Meetings)
- Metabolic syndrome: Definition, pathophysiology, and mechanisms (Miranda et al). 2005;149:33-45
- Systolic hypertension: An overview (Griffith et al). 2005;149:769-75 (Meetings)

Hypertrophic cardiomyopathy; *see* Cardiomyopathy, hypertrophic

Hypertrophy, left ventricular

- Additional impact of electrocardiographic over echocardiographic diagnosis of left ventricular hypertrophy for predicting the risk of ischemic stroke (Kohsaka et al). 2005;149:181-6
- Assessment of left ventricular mass using echocardiography: Use of fundamental imaging (Mansencal and Dubourg) (Letter); (Kohsaka and Di Tullio) (Reply). 2005;149:e29, e31
- Behavior of both epicardial and intramural coronary artery flow velocities in various models of myocardial hypertrophy: Role for left ventricular outflow tract obstruction (De Gregorio et al). 2005;149:1091-8
- Electrocardiographic diagnosis of left ventricular hypertrophy: The effect of left ventricular thickness, size, and mass on the specific criteria for left ventricular hypertrophy (Budhwani et al). 2005;149:709-14

Hypothermia

- Hypothermia is a bedside predictor of imminent death in patients with congestive heart failure (Casscells et al). 2005;149:927-33

I

Iliac artery

- Renal and iliac artery stenting by interventional cardiologists and vascular surgeons: The Foundation to Advance Medical Education (FAME) initiative (Holmes, Jr et al). 2005;149:883-7

Image enhancement

- Assessment of left ventricular mass using echocardiography: Use of fundamental imaging (Mansencal and Dubourg) (Letter); (Kohsaka and Di Tullio) (Reply). 2005;149:e29, e31

Implantable cardioverter defibrillator; *see* Defibrillators, implantable

Incidence

- Acute coronary syndrome statistics: What you don't see can hurt you (Rajagopal and Bhatt). 2005;149:955-6 (Editorial)
- Incidence, predictors, and outcomes of high-degree atrioventricular block complicating acute myocardial infarction treated with thrombolytic therapy (Meine et al). 2005;149:670-4
- Valsartan reduces the incidence of atrial fibrillation in patients with heart failure: Results from the Valsartan Heart Failure Trial (Val-HeFT) (Maggioni et al). 2005;149:548-57

Infection

- Stent implantation, but not pathogen burden, is associated with plasma C-reactive protein and interleukin-6 levels after percutaneous coronary intervention in patients with stable angina pectoris (Saleh et al). 2005;149:876-82

Inflammation

- An acute inflammatory reaction induced by myocardial damage is superimposed on a chronic inflammation in unstable coronary artery disease (James et al). 2005;149:619-26
- Atorvastatin has an important acute anti-inflammatory effect in patients with acute coronary syndrome: Results of a randomized, double-blind, placebo-controlled study (Macin et al). 2005;149:451-7
- Cigarette smoking is associated with increased circulating proinflammatory and procoagulant markers in patients with chronic coronary artery disease: Effects of aspirin treatment (Ikonomidis et al). 2005;149:832-9
- Erythrocyte adhesiveness/aggregation: A novel biomarker for the detection of low-grade internal inflammation in individuals with atherothrombotic risk factors and proven vascular disease (Berliner et al). 2005;149:260-7
- Metabolic syndrome: Definition, pathophysiology, and mechanisms (Miranda et al). 2005;149:33-45
- A perspective on the potential cardioprotective benefits of periodontal therapy (Offenbacher and Beck). 2005;149:950-4 (Editorial)
- Potential antiatherogenic and anti-inflammatory properties of sevelamer in maintenance hemodialysis patients (Ferramosca et al). 2005;149:820-5
- Urinary tract infection in patients with acute coronary syndrome: A potential systemic inflammatory connection (Sims et al). 2005;149:1062-5

Influenza

- Examining the coverage of influenza vaccination among people with cardiovascular disease in the United States (Ajani et al). 2005;149:254-9

Insulin

- Insulin-treated diabetes is associated with a marked increase in mortality in patients with advanced heart failure (Smooke et al). 2005;149:168-74
- Metabolic syndrome: Definition, pathophysiology, and mechanisms (Miranda et al). 2005;149:33-45

Insulin resistance

- Metabolic syndrome: Definition, pathophysiology, and mechanisms (Miranda et al). 2005;149:33-45

Interleukin-6

- An acute inflammatory reaction induced by myocardial damage is superimposed on a chronic inflammation in unstable coronary artery disease (James et al). 2005;149:619-26
- A perspective on the potential cardioprotective benefits of periodontal therapy (Offenbacher and Beck). 2005;149:950-4 (Editorial)
- Stent implantation, but not pathogen burden, is associated with plasma C-reactive protein and interleukin-6 levels after percutaneous coronary intervention in patients with stable angina pectoris (Saleh et al). 2005;149:876-82

Intra-aortic balloon pumping

- Does current treatment of cardiogenic shock complicating the acute coronary syndromes comply with guidelines? (Jakobishvili et al). 2005;149:98-103

Intravascular ultrasonography; *see* Ultrasonography, interventional

Iodixanol

- Cost-effectiveness of iodixanol in patients at high risk of contrast-induced nephropathy (Aspelin et al). 2005;149:298-303

Iohexol

- Cost-effectiveness of iodixanol in patients at high risk of contrast-induced nephropathy (Aspelin et al). 2005;149:298-303

Irbesartan

Effects of angiotensin-converting enzyme inhibitor plus irbesartan on maximal and submaximal exercise capacity and neurohumoral activation in patients with congestive heart failure (Blanchet et al). 2005;149:938.e1-938.e7

Ischemic heart disease; see Myocardial ischemia

K**Kidney artery**

Renal and iliac artery stenting by interventional cardiologists and vascular surgeons: The Foundation to Advance Medical Education (FAME) initiative (Holmes, Jr et al). 2005;149:883-7

Kidney diseases

Association of chronic kidney disease with clinical outcomes after coronary revascularization: The arterial revascularization therapies study (ARTS) (Ix et al). 2005;149:512-9

Cost-effectiveness of iodixanol in patients at high risk of contrast-induced nephropathy (Aspelin et al). 2005;149:298-303

To the Editor (Nagge et al) (Letter); (Kruse and Lee) (Reply). 2005;149:e21, e23-e24

Rationale—Trial to Reduce Cardiovascular Events with Aranesp Therapy (TREAT): Evolving the management of cardiovascular risk in patients with chronic kidney disease (Mix et al). 2005;149:408-13 (Trial design)

Kidney function

The relation of renal function to ischemic and bleeding outcomes with 2 different glycoprotein IIb/IIIa inhibitors: The Do Tirofiban and ReoPro Give Similar Efficacy Outcome (TARGET) trial (Berger et al). 2005;149:869-75

L**Lanotepase**

ST resolution in a single electrocardiographic lead: A simple and accurate predictor of cardiac mortality in patients with fibrinolytic therapy for acute ST-elevation myocardial infarction (Zeymer et al). 2005;149:91-7

Latin America

Cardiovascular disease in Latin America (Medina-Lezama et al). 2005;149:e13 (Letter)

Left ventricular dysfunction; see Ventricular dysfunction, left

Left ventricular hypertrophy; see Hypertrophy, left ventricular; Ventricular hypertrophy, left

Left ventricular outflow obstruction; see Ventricular outflow obstruction

- ST-segment elevation resolution and outcome in patients treated with primary angioplasty and glucose-insulin-potassium infusion (van der Horst et al). 2005;149:1135.e1-1135.e9
- Statins in acute coronary syndromes: The sooner, the better? (Schwartz). 2005;149:377-80 (Editorial)
- Thrombolytic therapy for eligible elderly patients with acute myocardial infarction (Yusuf et al) (Letter); (Avezum and Makdisse) (Reply). 2005;149:e25-e27
- Very early cardiac magnetic resonance imaging for quantification of myocardial tissue perfusion in patients receiving tirofiban before percutaneous coronary intervention for ST-elevation myocardial elevation (Steen et al). 2005;149:564.e1-564.e7

Myocardial infarction, prognosis

Correlation between the TIMI risk score and high-risk angiographic findings in non-ST-elevation acute coronary syndromes: Observations from the Platelet Receptor Inhibition in Ischemic Syndrome Management in Patients Limited by Unstable Signs and Symptoms (PRISM-PLUS) trial (Mega et al). 2005;149:846-50

Microalbuminuria: A strong predictor of 3-year adverse prognosis in nondiabetic patients with acute myocardial infarction (Koulouris et al). 2005;149:840-5

ST resolution in a single electrocardiographic lead: A simple and accurate predictor of cardiac mortality in patients with fibrinolytic therapy for acute ST-elevation myocardial infarction (Zeymer et al). 2005;149:91-7

Myocardial infarction, therapy

Assessment of Pexelizumab in Acute Myocardial Infarction (APEX AMI): A multicenter, randomized, double-blind, parallel-group, placebo-controlled study of pexelizumab in patients with acute myocardial infarction undergoing primary percutaneous coronary intervention (Armstrong et al). 2005;149:402-7 (Trial design)

Early cardiac catheterization is associated with lower mortality only among high-risk patients with ST- and non-ST-elevation acute coronary syndromes: Observations from the OPUS-TIMI 16 trial (Cantor et al). 2005;149:275-83

Enhancing reperfusion therapy for myocardial infarction with dual antiplatelet therapy: Breaking the glass ceiling (Fathi and Bhatt). 2005;149:947-9 (Editorial)

Enoxaparin versus unfractionated heparin as antithrombin therapy in patients receiving fibrinolysis for ST-elevation myocardial infarction: Design and rationale for the Enoxaparin and Thrombolysis Reperfusion for Acute Myocardial Infarction Treatment-Thrombolysis In Myocardial Infarction study 25 (ExTRACT-TIMI 25) (Antman et al). 2005;149:217-26 (Trial design)

Glucose-insulin-potassium and reperfusion in acute myocardial infarction: Rationale and design of the Glucose-Insulin-Potassium Study-2 (GIPS-2) (van der Host et al). 2005;149:585-91 (Trial design)

Hospital therapy traditions influence long-term survival in patients with acute myocardial infarction (Stenestrand et al). 2005;149:82-90

Impact of age on management and outcome of acute coronary syndrome: Observations from the Global Registry of Acute Coronary Events (GRACE) (Avezum et al). 2005;149:67-73

Invasive versus noninvasive management of ST-elevation acute myocardial infarction: A review of clinical trials and observational studies (Beck et al). 2005;149:194-9 (Curriculum cardiol.)

Long-term benefits of an early invasive management in acute coronary syndromes depend on intracoronary stenting and aggressive antiplatelet treatment: A metaregression (Biondi, Zoccai et al). 2005;149:504-11

Outcome of patients aged ≥ 75 years in the SHould we emergently revascularize Occluded Coronaries in cardiogenic shock (SHOCK) trial: Do elderly patients with acute myocardial infarction complicated by cardiogenic shock respond differently to emergent revascularization? (Dzavik et al). 2005;149:1128-34

Racial differences in reperfusion therapy use in patients hospitalized with myocardial infarction: A regional phenomenon (Rathore et al). 2005;149:1074-81

Myocardial ischemia, diagnosis

Exercise treadmill testing using a modified exercise protocol in women with suspected myocardial ischemia: Findings

from the National Heart, Lung and Blood Institute-sponsored Women's Ischemia Syndrome Evaluation (WISE) (Lewis et al). 2005;149:527-33

Magnetic resonance imaging of coronary arteries, the ischemic cascade, and myocardial infarction (Kaandorp et al). 2005;149:200-8 (Curriculum cardiol.)

Prediction of missed myocardial infarction among symptomatic outpatients without coronary heart disease (Sequist et al). 2005;149:74-81

Myocardial ischemia, drug therapy

Attenuation of reperfusion microvascular ischemia by aqueous oxygen: Experimental and clinical observations (Glazier). 2005;149:580-4 (Progress cardiol.)

Cardioprotection before revascularization in ischemic myocardial injury and the potential role of hemoglobin-based oxygen carriers (Burkhoff and Lefer). 2005;149:573-9 (Progress cardiol.)

The relation of renal function to ischemic and bleeding outcomes with 2 different glycoprotein IIb/IIIa inhibitors: The Do Tirofiban and ReoPro Give Similar Efficacy Outcome (TARGET) trial (Berger et al). 2005;149:869-75

Statins in acute coronary syndromes: The sooner, the better? (Schwartz). 2005;149:377-80 (Editorial)

Myocardial ischemia, prognosis

Prediction of death or myocardial infarction by exercise single photon emission computed tomography perfusion scintigraphy in patients who have had recent coronary artery stenting (Rajagopal et al). 2005;149:534-40

Myocardial reperfusion

Cardioprotection before revascularization in ischemic myocardial injury and the potential role of hemoglobin-based oxygen carriers (Burkhoff and Lefer). 2005;149:573-9 (Progress cardiol.)

Design and rationale of Clopidogrel as Adjunctive Reperfusion Therapy-Thrombolysis in Myocardial Infarction (CLARITY-TIMI) 28 trial (Sabatine et al). 2005;149:227-33 (Trial design)

Effect of clopidogrel plus aspirin on tissue perfusion and coronary flow in patients with ST-segment elevation myocardial infarction: A new reperfusion strategy (Dogan et al). 2005;149:1037-42

Enhancing reperfusion therapy for myocardial infarction with dual antiplatelet therapy: Breaking the glass ceiling (Fathi and Bhatt). 2005;149:947-9 (Editorial)

Enoxaparin versus unfractionated heparin as antithrombin therapy in patients receiving fibrinolysis for ST-elevation myocardial infarction: Design and rationale for the Enoxaparin and Thrombolysis Reperfusion for Acute Myocardial Infarction Treatment-Thrombolysis In Myocardial Infarction study 25 (ExTRACT-TIMI 25) (Antman et al). 2005;149:217-26 (Trial design)

Glucose-insulin-potassium and reperfusion in acute myocardial infarction: Rationale and design of the Glucose-Insulin-Potassium Study-2 (GIPS-2) (van der Host et al). 2005;149:585-91 (Trial design)

Racial differences in reperfusion therapy use in patients hospitalized with myocardial infarction: A regional phenomenon (Rathore et al). 2005;149:1074-81

Myocardial reperfusion injury

Attenuation of reperfusion microvascular ischemia by aqueous oxygen: Experimental and clinical observations (Glazier). 2005;149:580-4 (Progress cardiol.)

Cardioprotection before revascularization in ischemic myocardial injury and the potential role of hemoglobin-based

oxygen carriers (Burkhoff and Lefer). 2005;149:573-9 (Progress cardiol.)

Myocardial revascularization

Association of chronic kidney disease with clinical outcomes after coronary revascularization: The arterial revascularization therapies study (ARTS) (Ix et al). 2005;149:512-9

Cardioprotection before revascularization in ischemic myocardial injury and the potential role of hemoglobin-based oxygen carriers (Burkhoff and Lefer). 2005;149:573-9 (Progress cardiol.)

Collaterals and the recovery of left ventricular function after recanalization of a chronic total coronary occlusion (Werner et al). 2005;149:129-37

The Coronary Artery Revascularisation in Diabetes (CARDia) trial: Background, aims, and design (Kapur et al). 2005;149:13-19 (Trial design)

Does current treatment of cardiogenic shock complicating the acute coronary syndromes comply with guidelines? (Jakobishvili et al). 2005;149:98-103

Elective percutaneous coronary intervention using broad spectrum antiplatelet therapy (eptifibatide, clopidogrel, and aspirin) alone, without scheduled unfractionated heparin or other antithrombin therapy (Denardo et al). 2005;149:138-44

Outcome of patients aged ≥ 75 years in the SHould we emergently revascularize Occluded Coronaries in cardiogenic shock (SHOCK) trial: Do elderly patients with acute myocardial infarction complicated by cardiogenic shock respond differently to emergent revascularization? (Dzavik et al). 2005;149:1128-34

Revascularization of coronary atherosclerosis in patients with diabetes mellitus—There is more to it than meets the image intensifier (Petersen and Harrington). 2005;149:190-3 (Editorial)

Should we aggressively treat elderly patients with cardiogenic shock? (Hasdai). 2005;149:962-3 (Editorial)

Myocarditis

Diagnostic approach to the patient with cardiomyopathy: Whom to biopsy (Ardehali et al). 2005;149:7-12 (Curriculum cardiol.)

Myoglobin

Multimarker risk strategy for predicting 1-month and 1-year major events in non-ST elevation acute coronary syndromes (Bodi et al). 2005;149:268-74

Myopathy; *see* Muscular diseases

N

NANP; *see* Atrial natriuretic peptide, N-terminal

Natriuretic peptide, brain

B-type natriuretic peptide levels are not a surrogate marker for invasive hemodynamics during management of patients with severe heart failure (O'Neill et al). 2005;149:363-9

Carvedilol therapy is associated with a sustained decline in brain natriuretic peptide levels in patients with congestive heart failure (Frantz et al). 2005;149:541-7

Effect of body mass index on natriuretic peptide levels in patients with acute congestive heart failure: A ProBNP Investigation of Dyspnea in the Emergency Department (PRIDE) substudy (Krauser et al). 2005;149:744-50

Screening for heart disease in diabetic subjects (Fang et al). 2005;149:349-54

Unexpected BNP levels in patients with advanced heart failure: A tale of caution and promise (Drazner and de Lemos). 2005;149:187-9 (Editorial)

Necrosis

Myocardial contrast echocardiography accurately reflects transmural of myocardial necrosis and predicts contractile reserve after acute myocardial infarction (Janardhanan et al). 2005;149:355-62

Nephropathy; *see* Kidney diseases

Neurohormones; *see* Neurotransmitters

Neurotransmitters

Effects of angiotensin-converting enzyme inhibitor plus irbesartan on maximal and submaximal exercise capacity and neurohumoral activation in patients with congestive heart failure (Blanchet et al). 2005;149:938.e1-938.e7

Niacin

Is atorvastatin more appropriate to use in combination with niacin than simvastatin in patients with the metabolic syndrome? (Al-Shaer). 2005;149:e17 (Letter)

Nitric oxide

Lipid-independent effects of statins on endothelial function and bioavailability of nitric oxide in hypercholesterolemic patients (John et al). 2005;149:473.e1-473.e10

Nitric-oxide synthase

A polymorphism of the endothelial nitric oxide synthase promoter is associated with an increase in autonomic imbalance in patients with congestive heart failure (Binkley et al). 2005;149:342-8

Nitroglycerin

Association of intravenous morphine use and outcomes in acute coronary syndromes: Results from the CRUSADE Quality Improvement Initiative (Meine et al). 2005;149:1043-9

Norepinephrine

Carvedilol therapy is associated with a sustained decline in brain natriuretic peptide levels in patients with congestive heart failure (Frantz et al). 2005;149:541-7

O

Obesity

Effect of body mass index on natriuretic peptide levels in patients with acute congestive heart failure: A ProBNP Investigation of Dyspnea in the Emergency Department (PRIDE) substudy (Krauser et al). 2005;149:744-50

Metabolic syndrome: Definition, pathophysiology, and mechanisms (Miranda et al). 2005;149:33-45

Prognostic impact of body weight and abdominal obesity in women and men with cardiovascular disease (Dagenais et al). 2005;149:54-60

Orbofiban

Early initiation of lipid-lowering therapy for acute coronary syndromes improves compliance with guideline recommendations: Observations from the Orbofiban in Patients with Unstable Coronary Syndromes (OPUS-TIMI 16) trial (Smith et al). 2005;149:444-50

Outpatient care; *see* Ambulatory care

Oxygen

Attenuation of reperfusion microvascular ischemia by aqueous oxygen: Experimental and clinical observations (Glazier). 2005;149:580-4 (Progress cardiol.)

Cardioprotection before revascularization in ischemic myocardial injury and the potential role of hemoglobin-based oxygen carriers (Burkhoff and Lefer). 2005;149:573-9 (Progress cardiol.)

Oxygen consumption

Determinants of functional capacity in patients with chronic heart failure: Role of filling pressure and systolic and diastolic function (Smart et al). 2005;149:152-8

Oxygen uptake efficiency slope, a new submaximal parameter in evaluating exercise capacity in chronic heart failure patients (Van Laethem et al). 2005;149:175-80

P

Pacemaker, artificial

Detailed bacteriologic tests to identify the origin of transvenous pacing system infections indicate a high prevalence of multiple organisms (Klug et al). 2005;149:322-8

Patient admission

Impact of the application of the American College of Emergency Physicians recommendations for the admission of patients with syncope on a retrospectively studied population presenting to the emergency department (Elesber et al). 2005;149:826-31

Patient compliance

Clinical factors associated with abandonment of a rate-control or a rhythm-control strategy for the management of atrial fibrillation in the AFFIRM study (Curtis et al). 2005;149:304-8

Early initiation of lipid-lowering therapy for acute coronary syndromes improves compliance with guideline recommendations: Observations from the Orbofiban in Patients with Unstable Coronary Syndromes (OPUS-TIMI 16) trial (Smith et al). 2005;149:444-50

Why do patients fail to receive β -blockers for chronic heart failure over time? A "real-world" single-center, 2-year follow-up experience of β -blocker therapy in patients with chronic heart failure (Parameswaran et al). 2005;149:921-6

Patient discharge

Acute coronary syndrome national statistics: Challenges in definitions (Bertoni et al). 2005;149:1055-61

Patients

Improving blood pressure control by tailored feedback to patients and clinicians (Bosworth et al). 2005;149:795-803 (Meetings)

Percutaneous coronary intervention (PCI);

see Angioplasty; Myocardial revascularization; Stents

Pericardial effusion

Noninvasive evaluation of pericardial effusion composition by computed tomography (Rifkin et al). 2005;149:1120-7

Periodontitis

Periodontal treatment improves endothelial dysfunction in patients with severe periodontitis (Seinost et al). 2005;149:1050-4

A perspective on the potential cardioprotective benefits of periodontal therapy (Offenbacher and Beck). 2005;149:950-4 (Editorial)

Peripheral vascular disease

Development of a multicenter peripheral arterial interventional database: the PVD-QI² (Mukherjee et al). 2005;149:1003-8 (Trial design)

Pexelizumab

Assessment of Pexelizumab in Acute Myocardial Infarction (APEX AMI): A multicenter, randomized, double-blind, parallel-group, placebo-controlled study of pexelizumab in patients with acute myocardial infarction undergoing primary percutaneous coronary intervention (Armstrong et al). 2005;149:402-7 (Trial design)

Physical fitness

Relationship between adolescent fitness and fatness and cardiovascular disease risk factors in adulthood: The Aerobics Center Longitudinal Study (ACLS) (Eisenmann et al). 2005;149:46-53

Physicians

Conflict of interest for the physician-inventor using a device in human subjects (Popp). 2005;149:1-3 (Editorial)

Impact of physicians' beliefs and practices on cholesterol levels in patients with type 2 diabetes: A longitudinal assessment (Franciosi et al). 2005;149:104-11

Renal and iliac artery stenting by interventional cardiologists and vascular surgeons: The Foundation to Advance Medical Education (FAME) initiative (Holmes, Jr et al). 2005;149:883-7

Platelet activation

Cigarette smoking is associated with increased circulating proinflammatory and procoagulant markers in patients with chronic coronary artery disease: Effects of aspirin treatment (Ikonomidis et al). 2005;149:832-9

Platelet aggregation inhibitors

The Early Glycoprotein IIb/IIIa Inhibition in Non-ST-Segment Elevation Acute Coronary Syndrome (EARLY ACS) trial: A randomized placebo-controlled trial evaluating the clinical benefits of early front-loaded eptifibatide in the treatment of patients with non-ST-segment elevation acute coronary syndrome—Study design and rationale (Giugliano et al). 2005;149:994-1002 (Trial design)

Elective percutaneous coronary intervention using broad-spectrum antiplatelet therapy (eptifibatide, clopidogrel, and aspirin) alone, without scheduled unfractionated heparin or other antithrombin therapy (Denardo et al). 2005;149:138-44

Enhancing reperfusion therapy for myocardial infarction with dual antiplatelet therapy: Breaking the glass ceiling (Fathi and Bhatt). 2005;149:947-9 (Editorial)

Long-term benefits of an early invasive management in acute coronary syndromes depend on intracoronary stenting and aggressive antiplatelet treatment: A metaregression (Biondi-Zoccai et al). 2005;149:504-11

Regarding antithrombotic treatment after coronary stenting in patients on chronic oral anticoagulation (Rubboli et al). 2005;149(2):e1 (Letter)

The relation of renal function to ischemic and bleeding outcomes with 2 different glycoprotein IIb/IIIa inhibitors: The Do Tirofiban and ReoPro Give Similar Efficacy Outcome (TARGET) trial (Berger et al). 2005;149:869-75

The role of platelet glycoprotein IIIa polymorphism in the high prevalence of in vitro aspirin resistance in patients with intracoronary stent restenosis (Pamukcu et al). 2005;149:675-80

Postmenopause

Exercise as an alternative to oral estrogen for amelioration of endothelial dysfunction in postmenopausal women (Harvey et al). 2005;149:291-7

Practice guidelines

Does current treatment of cardiogenic shock complicating the acute coronary syndromes comply with guidelines? (Jakobishvili et al). 2005;149:98-103

Early initiation of lipid-lowering therapy for acute coronary syndromes improves compliance with guideline recommendations: Observations from the Orbofiban in Patients with Unstable Coronary Syndromes (OPUS-TIMI 16) trial (Smith et al). 2005;149:444-50

Impact of the application of the American College of Emergency Physicians recommendations for the admission of patients with syncope on a retrospectively studied population presenting to the emergency department (Elesber et al). 2005;149:826-31

Practical considerations of β -blockade in the management of the post-myocardial infarction patient (Fonarow). 2005;149:984-93 (Curriculum cardiol.)

Practice patterns

Hospital therapy traditions influence long-term survival in patients with acute myocardial infarction (Stenstrand et al). 2005;149:82-90

Prevalence

Depression and heart failure in patients with a new myocardial infarction (Powell et al). 2005;149:851-5

Prevalence of anemia and effects on mortality in patients with heart failure (Lindenfeld). 2005;149:391-401 (Curriculum cardiol.)

Prevalence of metabolic syndrome in cardiac rehabilitation secondary prevention programs (Savage et al). 2005;149:627-31

Screening for heart disease in diabetic subjects (Fang et al). 2005;149:349-54

Professional practice

Impact of physicians' beliefs and practices on cholesterol levels in patients with type 2 diabetes: A longitudinal assessment (Franciosi et al). 2005;149:104-11

Prognosis

Asymptomatic atrial fibrillation: Demographic features and prognostic information from the Atrial Fibrillation Follow-up Investigation of Rhythm Management (AFFIRM) study (Flaker et al). 2005;149:657-63

Benign outcome in a long-term follow-up of patients with hypertrophic cardiomyopathy in Brazil (Arteaga et al). 2005;149:1099-05

Blood pressure variability and prognosis in uncomplicated mild hypertension (Pierdomenico et al). 2005;149:934-8

Electrocardiographic damage scores and cardiovascular mortality (Richardson et al). 2005;149:458-63

Incremental prognostic value of exercise single-photon emission computed tomographic (SPECT) thallium 201 imaging in patients with ST-T abnormalities on their resting electrocardiograms (Kwok et al). 2005;149:145-51

Insulin-treated diabetes is associated with a marked increase in mortality in patients with advanced heart failure (Smooke et al). 2005;149:168-74

Left ventricular outflow tract obstruction provoked during dobutamine stress echocardiography predicts future chest pain, syncope, and near syncope (Dawn et al). 2005;149:908-16

Prognostic impact of body weight and abdominal obesity in women and men with cardiovascular disease (Dagenais et al). 2005;149:54-60

Safety and accuracy of multidetector row computed tomography for early assessment of residual stenosis of the infarct-related artery and the number of diseased vessels after acute myocardial infarction (Chiou et al). 2005;149:701-8

Systolic hypertension: An overview (Griffith et al). 2005;149:769-75 (Meetings)

Risk management

Risk reduction of cardiac events by screening of unknown asymptomatic coronary artery disease in subjects with type 2 diabetes mellitus at high cardiovascular risk: An open-label randomized pilot study (Faglia et al). 2005;149:283.e1-283.e6

Rupture

Plaque erosion in the culprit lesion is prone to develop a smaller myocardial infarction size compared with plaque rupture (Hayashi et al). 2005;149:284-90

S

Safety

Comparison of the efficacy and safety of atorvastatin initiated at different starting doses in patients with dyslipidemia (Jones et al). 2005;149:111.e1-111.e8

Economic analysis of the Assessment of the Safety and Efficacy of a New Thrombolytic Regimen (ASSENT-3) study: Costs of reperfusion strategies in acute myocardial infarction (Kaul et al). 2005;149:637-44

Efficacy, safety and tolerability of metoprolol CR/XL in patients with diabetes and chronic heart failure: Experiences from MERIT-HF (Deedwania et al). 2005;149:159-67

Efficacy and safety of a once-daily graded-release diltiazem formulation dosed at bedtime compared to placebo and to morning dosing in chronic stable angina pectoris (Glasser et al). 2005;149:290.e1-290.e9

Saphenous vein

Embolic protection during saphenous vein graft intervention using a second-generation balloon protection device—Results from the combined US and European pilot study of the TriActiv Balloon Protected Flush Extraction System (Carrozza, Jr et al). 2005;149:1136.e1-1136.e7

Screening; see Mass screening

Sevelamer

Potential antiatherogenic and anti-inflammatory properties of sevelamer in maintenance hemodialysis patients (Ferramosca et al). 2005;149:820-5

Sex

Sex, quality of care, and outcomes of elderly patients hospitalized with heart failure: Findings from the National Heart Failure Project (Rathore et al). 2005;149:121-8

Shock, cardiogenic

Does current treatment of cardiogenic shock complicating the acute coronary syndromes comply with guidelines? (Jakobishvili et al). 2005;149:98-103

Outcome of patients aged ≥ 75 years in the SHould we emergently revascularize Occluded Coronaries in cardiogenic shock (SHOCK) trial: Do elderly patients with acute myocardial infarction complicated by cardiogenic shock respond differently to emergent revascularization? (Dzavik et al). 2005;149:1128-34

Should we aggressively treat elderly patients with cardiogenic shock? (Hasdai). 2005;149:962-3 (Editorial)

Simvastatin

Comparison of ezetimibe plus simvastatin versus simvastatin monotherapy on atherosclerosis progression in familial hypercholesterolemia: Design and rationale of the Ezetimibe and Simvastatin in Hypercholesterolemia Enhances Atherosclerosis Regression (ENHANCE) trial (Kastelein et al). 2005;149:234-9 (Trial design)

Dose-comparison study of the combination of ezetimibe and simvastatin (Vytorin) versus atorvastatin in patients with hypercholesterolemia: The Vytorin Versus Atorvastatin (VYVA) Study (Ballantyne et al). 2005;149:464-73

Is atorvastatin more appropriate to use in combination with niacin than simvastatin in patients with the metabolic syndrome? (Al-Shaer). 2005;149:e17 (Letter)

Simvastatin does not inhibit intimal hyperplasia and restenosis but promotes plaque regression in normocholesterolemic patients undergoing coronary stenting: A randomized study with intravascular ultrasound (Petrone et al). 2005;149:520-6

Single-photon emission-computed tomography;

see Tomography, emission-computed, single-photon

Sirolimus

Primary stenting of occluded native coronary arteries II—Rationale and design of the PRISON II study: A randomized comparison of bare metal stent implantation with sirolimus-eluting stent implantation for the treatment of chronic total coronary occlusions (Rahel et al). 2005;149:414.e1-414.e3 (Trial design)

Smoking

Cigarette smoking is associated with increased circulating proinflammatory and procoagulant markers in patients with

- chronic coronary artery disease: Effects of aspirin treatment (Ikonomidis et al). 2005;149:832-9
- Smoking cessation in patients with coronary artery disease (Ludvig et al). 2005;149:565-72 (Curriculum cardiol.)

- Relationship between adolescent fitness and fatness and cardiovascular disease risk factors in adulthood: The Aerobics Center Longitudinal Study (ACLS) (Eisenmann et al). 2005;149:46-53
- Troponin I**
- Multimarker risk strategy for predicting 1-month and 1-year major events in non-ST elevation acute coronary syndromes (Bodi et al). 2005;149:268-74

Tunica intima

The angiotensin II receptor blocker candesartan cilexetil reduces neointima proliferation after coronary stent implantation: A prospective randomized study under intravascular ultrasound guidance (Yoshida et al). 2005;149:144.e1-144.e6

Type B aortic dissection; see Aneurysm, dissecting

U

Ultrasonography, interventional

The angiotensin II receptor blocker candesartan cilexetil reduces neointima proliferation after coronary stent implantation: A prospective randomized study under intravascular ultrasound guidance (Yoshida et al). 2005;149:144.e1-144.e6

Repeat stenting for the prevention of the early lumen loss phenomenon in patients with in-stent restenosis: Angiographic and intravascular ultrasound findings of a randomized study (Alfonso et al). 2005;149:335.e1-335.e8

Simvastatin does not inhibit intimal hyperplasia and restenosis but promotes plaque regression in normocholesterolemic patients undergoing coronary stenting: A randomized study with intravascular ultrasound (Petronio et al). 2005;149:520-6

United States

Characteristics and outcomes of patients hospitalized for heart failure in the United States: Rationale, design, and preliminary observations from the first 100,000 cases in the Acute Decompensated Heart Failure National Registry (ADHERE) (Adams Jr. et al). 2005;149:209-16 (Trial design)

Examining the coverage of influenza vaccination among people with cardiovascular disease in the United States (Ajani et al). 2005;149:254-9

Urinary tract infection

Urinary tract infection in patients with acute coronary syndrome: A potential systemic inflammatory connection (Sims et al). 2005;149:1062-5

V

Vaccination

Examining the coverage of influenza vaccination among people with cardiovascular disease in the United States (Ajani et al). 2005;149:254-9

Vagus nerve

Heart rate variability biofeedback as a behavioral neurocardiac intervention to enhance vagal heart rate control (Nolan et al). 2005;149:1137.e1-1137.e7

Valsartan

Valsartan reduces the incidence of atrial fibrillation in patients with heart failure: Results from the Valsartan Heart Failure Trial (Val-HeFT) (Maggioni et al). 2005;149:548-57

Vascular diseases

Erythrocyte adhesiveness/aggregation: A novel biomarker for the detection of low-grade internal inflammation in individuals with atherothrombotic risk factors and proven vascular disease (Berliner et al). 2005;149:260-7

Vasodilation

Exercise as an alternative to oral estrogen for amelioration of endothelial dysfunction in postmenopausal women (Harvey et al). 2005;149:291-7

Venous thrombosis

Prospective randomized comparison of early and late results of a carbonized stent versus a high-grade stainless steel stent of identical design: The Prevention of Recurrent Venous Thromboembolism (PREVENT) trial (Sick et al). 2005;149:681-8

Ventricular dysfunction, left

Effect of coronary artery bypass grafting and aneurysmectomy on QT dispersion in moderate or severe left ventricular dysfunction (Gulcan et al). 2005;149:917-20

Implantable cardioverter defibrillators and cardiac resynchronization therapy in patients with left ventricular dysfunction: Randomized trial evidence through 2004 (Al-Khatib et al). 2005;149:1020-34 (Meetings)

Left ventricular systolic asynchrony after acute myocardial infarction in patients with narrow QRS complexes (Zhang et al). 2005;149:497-503

Oxygen uptake efficiency slope, a new submaximal parameter in evaluating exercise capacity in chronic heart failure patients (Van Laethem et al). 2005;149:175-80

Predictors of response to cardiac resynchronization therapy (PROSPECT)—study design (Yu et al). 2005;149:600-5 (Trial design)

Screening for heart disease in diabetic subjects (Fang et al). 2005;149:349-54

Ventricular ejection fraction; see Stroke volume

Ventricular fibrillation; see Arrhythmia

Ventricular function, left

Collaterals and the recovery of left ventricular function after recanalization of a chronic total coronary occlusion (Werner et al). 2005;149:129-37

A Doppler-derived index of combined left ventricular systolic and diastolic function is an independent predictor of cardiovascular mortality in elderly men (Ärnlov et al). 2005;149:902-7

Ventricular hypertrophy, left

Screening for heart disease in diabetic subjects (Fang et al). 2005;149:349-54

Ventricular outflow obstruction

Behavior of both epicardial and intramural coronary artery flow velocities in various models of myocardial hypertrophy: Role for left ventricular outflow tract obstruction (De Gregorio et al). 2005;149:1091-8

Left ventricular outflow tract obstruction provoked during dobutamine stress echocardiography predicts future chest pain, syncope, and near syncope (Dawn et al). 2005;149:908-16

Ventricular pressure

Determinants of functional capacity in patients with chronic heart failure: Role of filling pressure and systolic and diastolic function (Smart et al). 2005;149:152-8

Vytorin

Dose-comparison study of the combination of ezetimibe and simvastatin (Vytorin) versus atorvastatin in patients with hypercholesterolemia: The Vytorin Versus Atorvastatin (VYVA) Study (Ballantyne et al). 2005;149:464-73

W

Waist-hip ratio

Prognostic impact of body weight and abdominal obesity in women and men with cardiovascular disease (Dagenais et al). 2005;149:54-60

Warfarin

Clopidogrel-aspirin combination for atrial fibrillation: CLAAF is not CLEAR (Jackson et al) (Letter); (De Caterina and Lorenzoni) (Reply). 2005;149(1):e3, e4

Weight loss

Diet and blood pressure: Applying the evidence to clinical practice (Ard and Svetkey). 2005;149:804-12 (Meetings)

Women

- Ethnic differences in cardiovascular risk factor burden among middle-aged women: Study of Women's Health Across the Nation (SWAN) (Matthews et al). 2005;149:1066-73
- Exercise treadmill testing using a modified exercise protocol in women with suspected myocardial ischemia: Findings from the National Heart, Lung and Blood Institute-sponsored Women's Ischemia Syndrome Evaluation (WISE) (Lewis et al). 2005;149:527-33
- The Women's Recovery from Sternotomy (WREST) Study: Design of a randomized trial of a novel undergarment for

early use after sternotomy (King et al). 2005;149:761-7 (Trial design)

Y**Yttrium radioisotopes**

- Two-year clinical follow up of $^{90}\text{Sr}/^{90}\text{Y}$ β -radiation versus placebo control for the treatment of in-stent restenosis (Silber et al). 2005;149:689-94
